TechShare.Juvenile

Agencies helping to rehabilitate youth by sharing records state-wide

SOLUTION OVERVIEW

TechShare.Juvenile is a robust case management system designed for law enforcement, juvenile probation, proecutors, county and district clerks, municipal courts and school districts managing at-risk youth, Children in Need of Supervision (CINS) or juveniles who commit delinquent conduct offenses. This system replaced Caseworker, which was the system utilized by most counties in the State of Texas for the purposes of reporting data to the Texas Juvenile Justice Department (TJJD). Currently, there are two versions: TechShare.Basic and TechShare.Juvenile:

BASIC

- Access to data provided by member counties
- Track and report data to Texas Juvenile Justice Department (TJJD)
- Limited court functions
- County system administration
- Juvenile identification
- System administration

ADVANCED

- Law enforcement management of first offender programs
- Jail logs for juvenile processing offices
- Electronic notice and status updates to schools
- Case management for probation supervision
- Electronic disposition reporting for intake and prosecutor
- Institution and facility management
- District/County Clerk and court functions
- Integration to Livescan and LEA RMS

Success Metrics

"The system allows counties to gather data to analyze and understand success rates in an effort to better allocate resources."
—*Tarrant County Juvenile Department*

No state funds were used to produce these materials.

TechShare

Benefits to Your County

- Counties can choose to implement external agencies such as:
  - Law Enforcement
  - Municipal Courts
  - School Districts

- Visibility to data on juvenile offenders across county boundaries.

- Provides a holistic picture of youth within the county.

- Electronic case filing.

- County customizable forms for easy reporting.

- Municipal court interface to create and manage contact orders and statistical reporting.

- Law enforcement management of first offender programs.

- User feedback guide features and functionality of the system.

- Expanded case management features for juvenile probation.

- Ease of administration of dentention and county-managed placement facilities.

CASE INTAKE
"The system integrates with Noble so that officers don't have to spend time doing double entry."
—*Montgomery County Juvenile Services*

INCREASED TRANSPARENCY
"Having the ability to see if a child has been handled by another agency has been invaluable to our department."
—*Denton County Juvenile Services*

FISCAL RESPONSIBILITY
"The master referral has saved our county time and money because we have faster response times which means less postponements and court hearings."
—*Dallas County Juvenile Services*

250 COUNTIES SHARING JUVENILE DATA IN TEXAS

COMPANY OVERVIEW
The Texas Conference of Urban Counties is a non-profit organization composed of 37 member counties that represent approximately 80% of the population of Texas.

Established in 2004, TechShare is an innovative program of the Texas Conference of Urban Counties. Our focus is on developing information technology solutions for counties. TechShare projects are collaborative efforts that save counties money by sharing the cost of research, development, operations, and maintenance.

These projects produce applications, systems, or other technology assets to enable more efficient processes.
